DETAILED ACTION

Drawings

1. The application have been allowed, formal drawings are required in response to this Office action.

Allowable Subject Matter

2. Claims 1-32 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-27 is the inclusion of the limitations of an antenna comprising: a first vertical surface of the plurality of vertical surfaces for connecting to a signal feed for the antenna; and a second and a third vertical surface of the plurality of vertical surfaces for connecting to ground. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 28-32 is the inclusion of the limitations of an antenna comprising: a bottom edge of the first surface for connecting to a signal feed; and a bottom edge of the second and the third surfaces for connecting to ground. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Apostolos (U.S. Patent No. 6,373,446) teaches an improved cross-element meander line loaded antenna. Two pairs of triangle-shaped elements are each

connected at their vertices to form bow-tie elements. The bow-tie elements are arranged orthogonally adjacent a ground plane, reducing shadowing and cross-coupling. When fed in quadrature, the antenna radiates a circularly polarized RF field. However, Apostolos does not disclose or suggest a bottom edge of the first vertical surface for connecting to a signal feed; and a bottom edge of the second and the third vertical surfaces for connecting to ground.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
